

SPace

> What for

Software for matching logs with boards based on properties measured on logs and boards, e.g. length.

The software is directed to sawmills that need to trace boards back to the correct log without adding special equipment for this purpose.

With further development, and combined with methods for tracing batches, the Space principle can be used to create traceability from log yard to final sorting

SPaceData

WorkOrders: [List] | Check Workorders | Logflow/Creation | Pacing | Info about PLU153170019
 No of logs: 6595
 No of boards: 12978
 SVV log length: 479.62452107299

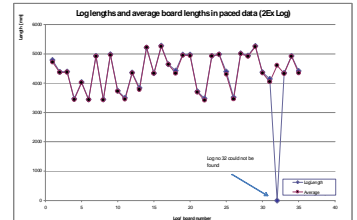

Max Leng: 120 | Max Leng diff: 120
 Max ret board offset: 15
 Max summetel vid pairing: 1000
 Bulllength: 35
